What is reinforcement learning?

The uploaded PDFs don't mention this.

Why does RAG improve factual accuracy?

RAG improves factual accuracy by retrieving relevant documents from an external knowledge base and using them to generate grounded responses, instead of relying solely on a model's internal (static) knowledge, which may hallucinate. (PDF p. 1)

It connects to updatable knowledge sources and provides traceable context. (PDF p. 1)

Where are vectors stored?

Vectors are stored in a database such as Supabase with pgvector. (PDF p. 2)
